

SF - Series Vibratory Sieves

SF SERIES ROUND VIBRATING SCREEN is a high precision machine with the low noise, high efficiency and whole-closed structure, which is suitable to filter particle, powder and sticky liquid material.

The machine can work continuously.
Separated material discharged automatically.

Application Areas:

Chemical industry: Resin, pigment, industrial medicine, cosmetic, coatings, etc.

Food industry: Sugar powder, starch, salt, rice noodles, milk powder, soybean milk, egg powder, sauce, syrup, etc.

All contact parts are made of SUS304
